

Allied's Tune-Up Kits

A convenient and cost effective solution for proper hammer maintenance

Allied's Tune-Up Kits Restore Your Hydraulic Hammer to Peak Performance

The main objective of hydraulic impact hammers is to demolish materials without demolishing themselves. As a result, Allied has designed their hydraulic hammers so that critical parts that wear can be replaced easily.

Instead of a complete hydraulic hammer rebuild, you can regularly restore your hammer's performance by simply replacing a limited number of component parts. Allied Tune-Up Kits contain the right parts for your hammer restoration and are specially-designed for Allied's Rammer, all-new Hy-Ram[®] and AR Series[™] hammers. The Allied Tune-Up Kits include a lower tool bushing, complete hammer seal set, accumulator membrane and tool retainer pin(s)/bars.

The best feature of the Allied Tune-Up Kits is that they give you the component parts that you need for each hammer model **all in one package**. The Tune-Up Kits make hammer service and maintenance easy, convenient and economical. Benefits include:

- Save Time— There is no need to identify, order or collect individual parts.
- Save Money— A Kit is less expensive to purchase than the individual parts.
- Reliability— All of the components are Genuine Allied OEM Parts.
- Peace-of-Mind— The Kits always contain the most up-to-date parts.

When you purchase an Allied Rammer, all-new Hy-Ram[®] and AR Series[™] Tune-Up Kit, nothing is left to chance. Allied Tune-Up Kits are the convenient and cost effective solution for proper hammer service and maintenance. **The right parts. All in one package. Guaranteed.**

AR Series[™] Hammers

Part No.	Model
